

ANNEX 6.3 (TO CHAPTER 6)

Per annum volume distribution in the book by Baronius describing mediaeval Rome

See Baronius, C., *The Ecclesial and Secular Annals from the Birth of Christ and until the Year 1198*. Moscow, Typography of P. P. Ryabushinsky, 1913. (*Baronius. Annales ecclesiastici a Christo nato ad annum 1198.*)

The *first* column of the table indicates *the year* A.D.

The *second* column indicates the names of the Roman emperors and the years of their reigns according to Baronius. E.g., the first line: column 1, “1”; column 2, “Augustus 42.” This means that the year 1 A.D. corresponds to the 42nd year of the reign of Augustus.

Along with the emperors, Baronius mentions Roman Pontiffs (Popes) with years of their reigns (pontificates). This data is presented in the *third* column.

The *fourth* column, separated from the third one by an equal mark, indicates the volume of the part of Baronius’ book describing this year, measured in centimeters of “height” that this text fragment occupies in the book. Sometimes Baronius happens to describe a certain period of several years at once, that is, without clarifying the precise year of a certain event within this fragment. In this case, we *uniformly* distribute the volume of this text fragment among all the years it consists of, or divide the summarized volume by the number of years described, and assign the result – *the average value* – to every single year within this interval.

<i>Year</i>	<i>Emperors</i>	<i>Popes</i>	<i>Volume</i>
	Augustus		
1	42		=20
2	43		=20
